Professional Summary

Visionary Full Stack Developer and Certified Scrum Master with 7+ years of experience building cutting-edge digital solutions that merge modern web development with AI and LLM capabilities. Specialized in designing and scaling intelligent platforms across healthcare, business, and customer engagement sectors. Proven expertise in **end-to-end product development, LLM integrations, prompt engineering, and AI tool commercialization**. Recognized for transforming complex challenges into high-impact, scalable solutions that drive value and innovation.

Core Competencies

AI & LLM Tools: Prompt Engineering, LangChain, GPT-4, OpenAI API, Hugging Face Transformers

Full Stack Development: React, Vue, Streamlit, TypeScript, Node.js, Django, FastAPI

Cloud & DevOps: Docker, Kubernetes, AWS, Azure, GitHub Actions, CI/CD Pipelines

Databases: PostgreSQL, MongoDB, SQLite, MySQL

Agile Leadership: Scrum Ceremonies, Team Coaching, Sprint Planning, Kanban, Jira

Automation & Testing: Selenium, Pytest, Unit Testing, E2E Testing

Languages: Python, JavaScript, Java, C++, PHP

Professional Experience

CEO & Lead AI Architect

CodeCodix – 2018 – Present

- Lead architect behind AI-based tools for healthcare and enterprise productivity, including **virtual assistants, automated workflows, and AI marketplaces**.
- Directed cross-functional Agile teams to develop LLM-integrated SaaS platforms with seamless user experiences and real-time analytics.
- Built a white-label AI assistant system with revenue-sharing models, increasing B2B engagement by 50%.

- Spearheaded the **AI-lización** initiative, transforming traditional industries through modular AI systems.

Full Stack Developer & Scrum Master

AI Medicare – 2021 – Present

- Developed a fully operational **hospital management system** using Streamlit and SQLite, managing patient admissions, emergency workflows, and operating room scheduling.
- Integrated OpenAI LLMs to power conversational agents for **hospital FAQs**, internal support, and social media responses.
- Enforced secure authentication and RBAC systems using **JWT tokens**, enhancing privacy and compliance.
- Led Agile sprints, retros, and demos, increasing team velocity by 35%.

AI & Prompt Engineer | Consultant

Freelance Projects – 2021 – Present

- Designed and delivered **custom GPT-powered solutions** for startups and SMEs in healthcare, customer service, marketing, and logistics.
- Conducted **prompt engineering workshops** for businesses and developers adopting LLMs.
- Developed **multilingual virtual assistants** and trained fine-tuned models tailored to niche industry use cases.

Education & Certifications

Bachelor of Science in Computer Science – *Holberton School* – 2020

Certified Scrum Master (CSM) – *International Scrum Institute* – 2023

Key Achievements

-  Launched **AI-powered hospital platform** in Manta, Ecuador—currently handling real-world operations and patient logistics.

-  Created **AI Business Cards** with embedded LLM chat, redefining personal branding and professional networking.
 -  Built the **Botarmy Hub**, a virtual assistant marketplace with built-in reseller incentives (50% commissions), significantly expanding outreach.
 -  Developed an **AI-driven social media and public relations platform** for healthcare communication teams.
 -  Designed **ERP-like tools** for industries such as fishing, agriculture, and tourism under the **AI-lización** model.
-

Languages

- **Spanish:** Native
 - **English:** Fluent
-

Projects

Hospital AI Management Suite

Modular Streamlit-based platform covering user management, patient workflows, emergency triage, OR scheduling, and integrated LLM agents.

AI Interactive Business Card

Smart business card combining real-time chat, personal portfolio, and contact features. Ideal for networking events and online discovery.

Botarmy & Botarmy-Hub

AI assistant reseller platform with affiliate management, revenue sharing, and deployment tools for clients in retail, health, and consulting sectors.

NautiAI (ERP for Tuna Industry)

Industry-specific AI ERP tool for resource planning and logistics aboard fishing fleets.
